# AO 2 TYPICAL INSTALLATTION Standard base only

# REQUIRED MATERIALS FOR ACTION OFFICE TWO/ENCORE® SYSTEM (See Components List)

#### **Standard Base**

- One Double Base Box (L-202) for 4 outlets total side-by-side base (National base only), or one regular Base Box (L-201) box for 2 outlets total back-to-back (Chicago base only). Exception: All boxes can accommodate back-to-back receptacles.
- 2. A Baseline Receptacle for each baseline outlet location.
- A Special Order Vertical Panel Box (E-502) where desired. This box accommodates two
  duplex outlets and two data openings. On back-to-back installations, one box is required
  for each side.
- 4. Receptacles for the Vertical Panel Box can be ordered with the color designation and the "V" suffix. (ie. J-401 BK V, J-406 GY V, etc.)
- 5. One Special Order Power Raceway Feeder Kit (E-503) to feed Vertical Panel Boxes. One kit will feed two boxes on back-to-back installations.

#### **Narrow Base**

- 1. One Double Base Box (L-204) for 2 outlets maximum. Either side-by-side base or 2 on opposite sides back-to-back. 4 outlets on one panel, 2 on each side, requires 2 L-204.
- 2. A decorator style receptacle for each baseline outlet location.

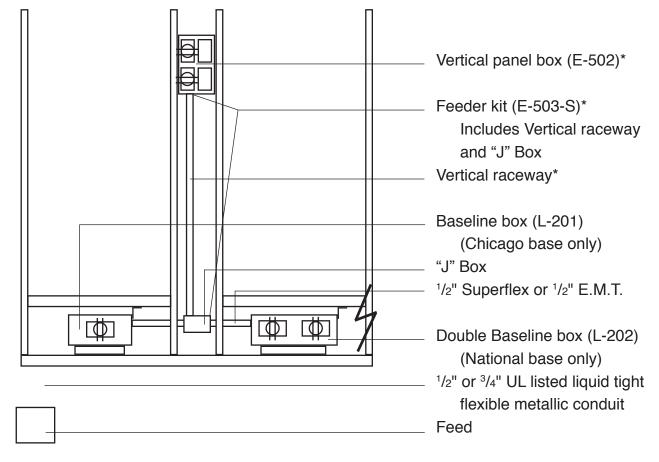

#### NOTES:

- A. The entire system can be interconnected with 1/2" extra flexible conduit or 1/2" E.M.T. (See Diagram)
- B. Recommended wiring is T.H.H.N. stranded.
- C. Conduit is held in place with K16 Caddy Clips.
- D. Each Base Box bolts to existing holes in the base of the frames of 24" and 30" panels. Larger panels require that a 1/4" minimum hole be drilled at each box location.
- E. Each Special Order Vertical Panel Box is anchored using existing holes and one <sup>3</sup>/16" x <sup>3</sup>/4" RHMS and nut when installed at standard height. (Standard is 31 <sup>1</sup>/2" from floor to bottom of box.) Installation at any other height requires drilling a new mounting hole.
- F. Each Special Order Power Raceway Feeder Kit is anchored using a one hole strap and box clip.
- G. Box areas are as follow:
  - a. L-201 Base box 54 c.i.
  - b. L-202 Base box 90 c.i.
  - c. E-502 Vertical Panel Box (power section only) 30 c.i.
  - d. E-503-S Raceway 100% area .2244". (At 40% fill, seven #12 T.H.H.N. max.)
  - e. E-503-S "J" box 15 c.i.
- H. Data capacity is thirtytwo 4 pair cables.
- J. Many styles of communications outlets are available for all types of data and phone receptacles to fit Vertical Panel Boxes.

For additional product information, please contact **En-tal Industries** at (773) 463-0440. Check with local codes prior to installation.
